Advanced Data Modelling and Form Design

Aim :
To extend the Job Application in Zoho Creator by implementing advanced field types and features such as lookup fields, image and file uploads, numeric validation, sub forms, URL fields, video/file uploads, fee and accommodation details, rich text content, and digital signatures.

Theory:
Data modelling and advanced form design in Zoho Creator involve structuring complex, multi-type data into logical sections to support relational integrity, multimedia handling, sub-records, and automated verification. Beyond standard inputs, Zoho Creator supports specialized fields such as Lookup (relational mapping), Subform (one-to-many child records), Image, File Upload, Audio, Video, Currency, Percent, Rich Text, Signature, and Date-Time.

In this experiment, advanced sections of the **Job Application Form** (or **Candidate Evaluation & Verification Form**) are designed to capture verification references, rich media, compensation details, and digital authorization. The form is structured into the following sections:

- **Section E — Academic & Referral Verification:** Handles credential validation and relational mapping through **Referral Employee Lookup** (*Lookup* field referencing existing employee data), **Candidate Photo** (*Image* field), **Resume Upload** (*File Upload* field), **Academic CGPA** (*Decimal* field), and **Previous Employment History** (*Subform* component for tabular, multi-row work records).

- **Section F — Employment History & Media Details:** Gathers digital media and candidate portfolios via **Portfolio GitHub URL** (*URL* field), **Video Resume** (*Video* field), and **Self Introduction Audio** (*Audio* field).

- **Section G — Compensation & Relocation:** Captures financial and logistical expectations using **Willing To Relocate** (*Decision Box / Checkbox* field), **Current Annual CTC** (*Currency* field), and **Expected Salary Hike Percent** (*Percent* field).

- **Section H — Declaration & System-Generated Values:** Facilitates compliance, branding, and auditing through **Company Culture Display** (*Rich Text* field), **Candidate Digital Signature** (*Signature* field), and **Application Submitted On** (*Date-Time* system/audit field).

Procedure:

1. Open the existing Candidate Application & Recruitment Management application in Zoho Creator.

2. Edit the form and add the advanced verification and media sections:

    - Section E — Academic & Referral Verification

    - Section F — Employment History & Media Details

    - Section G — Compensation & Relocation

    - Section H — Declaration & System-Generated Values

3. Insert the required specialized fields into each respective section:

    - Section E: Add a Lookup field for Referral Employee Lookup, an Image field for Candidate Photo, a File Upload field for Resume Upload, a Decimal field for Academic CGPA, and a Subform for Previous Employment History.

- Section F: Add a URL field for Portfolio GitHub URL, a Video field for Video Resume, and an Audio field for Self Introduction Audio.

- Section G: Add a Decision Box (checkbox) for Willing To Relocate, a Currency field for Current Annual CTC, and a Percent field for Expected Salary Hike Percent.

- Section H: Add a Rich Text field for Company Culture Display, a Signature field for Candidate Digital Signature, and a Date-Time field for Application Submitted On.

4. Configure field properties, including decimal precision for CGPA and CTC, supported media file extensions, and read-only or auto-fill settings for the submission timestamp.

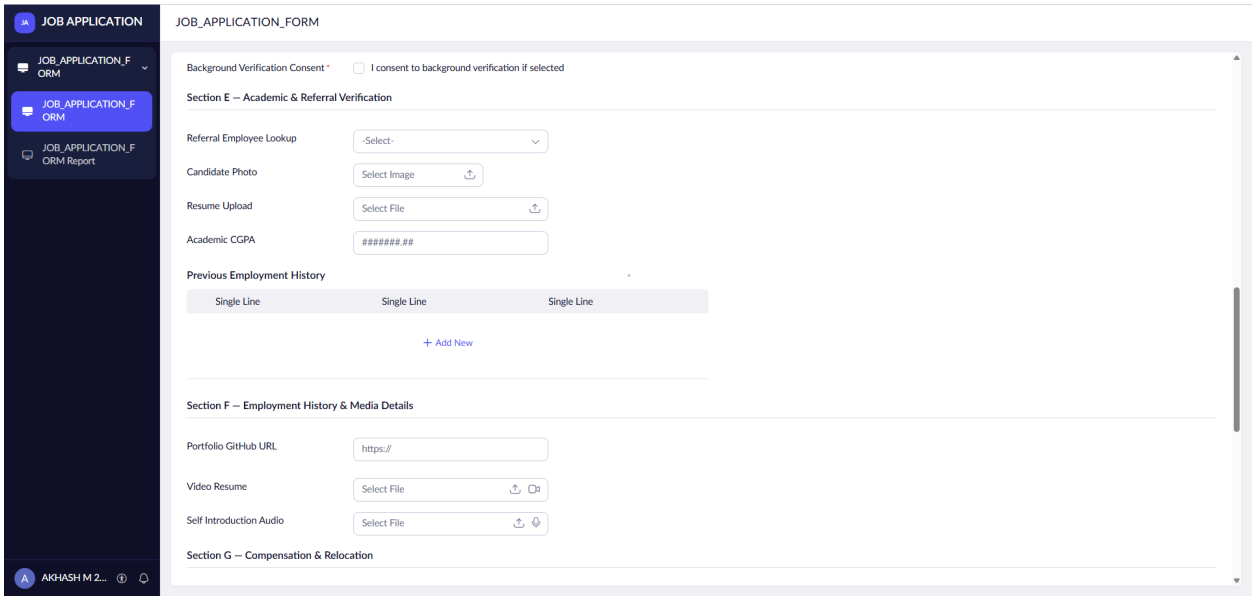

5. Save the form schema and switch to live/preview mode.

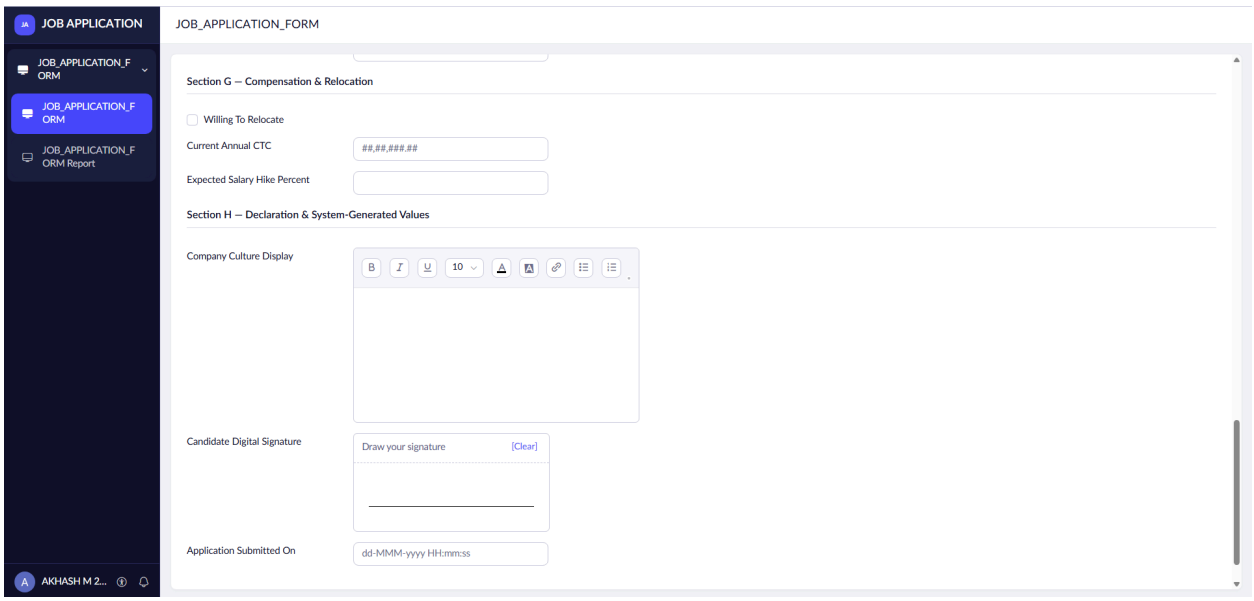

6. Test multi-row record insertion in the Previous Employment History subform and upload sample media files (photo, resume, video, audio).

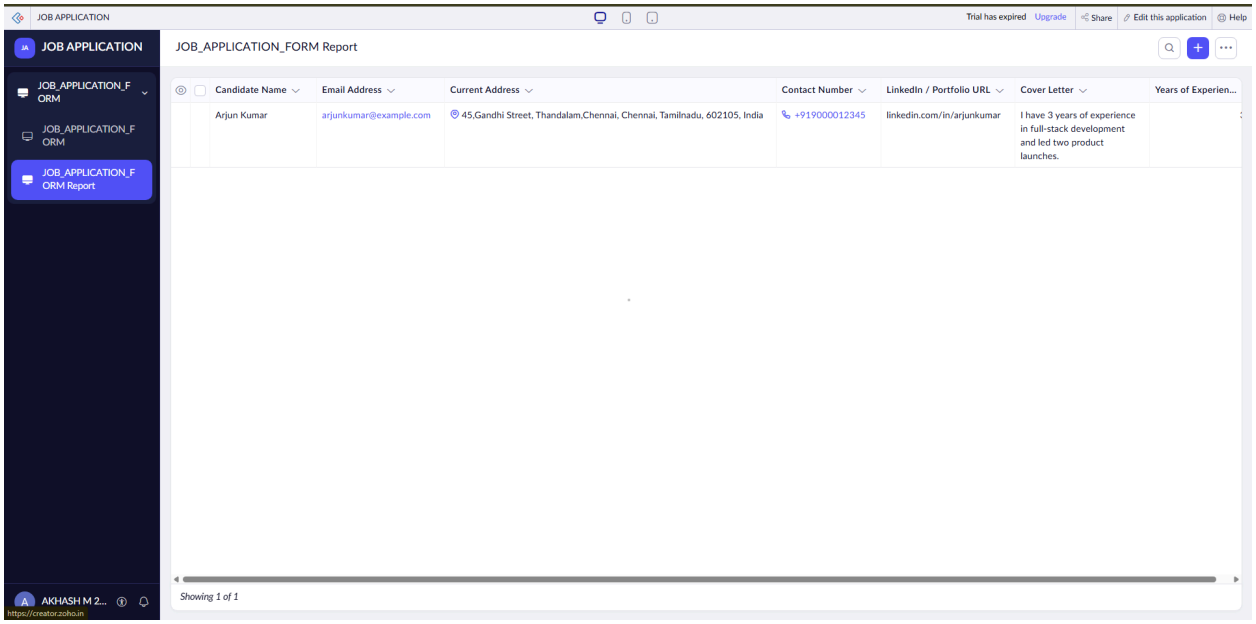

7. Provide a sample digital signature in the canvas and submit the record.

8. Access the comprehensive report to verify nested subform data, attached media files, and formatted currency/signature outputs.

Result:

The Job Application was successfully created in Zoho Creator with a structured data model, appropriate validations, and organized sections. Participant records were successfully submitted and displayed in the Job Application Report, enabling efficient participant verification and Job Application.
