Bank Loan Application - Zoho Creator Reports Suite

Aim:

To design and build a complete suite of Reports in Zoho Creator for the **"Job Application"** application, demonstrating the correct usage of all nine Report Types available in Zoho Creator.

Reports Used Overview

Report Type	Report Name
List View	All_Applications_List
Spreadsheet View	Applications_Spreadsheet
Kanban View	Application_Status_Kanban
Calendar View	Interview_Schedule_Calendar
Map View	Candidate_Location_Map
Timeline View	Application_Activity_Timeline

Pivot Table	Department_By_EmploymentType_Pivot
Chart View	Department_Applications_Chart
Summary View	Department_Wise_Summary

Detailed Report Descriptions

1. All_Applications_List (List View)

- Purpose: Default landing report for the HR recruitment team, displaying all candidate job applications in a clean, searchable tabular format.

- Features: Includes a global search bar, descending sort order based on application submission timestamp, and column-level filters for Department Applied For, Employment Type Preferred, and Application Status.

2. Applications_Spreadsheet (Spreadsheet View)

- Purpose: Utilized daily by recruiters and hiring managers to review and update application parameters quickly in a grid layout.

- Features: Rows are grouped by Department Applied For; permits inline editing for Screening Status, Interview Round, and Interviewer Assigned, while keeping baseline applicant credentials and personal details read-only to safeguard data integrity.

3. Application_Status_Kanban (Kanban View)

- Purpose: Provides a visual hiring pipeline for tracking how candidates progress through various recruitment stages (`Applied`, `Screening`, `Interview`, `Offer`, `Rejected`).

- Features: Interactive cards displaying Candidate Name, Department, and Experience can be dragged across stage columns to automatically update the underlying application status in real time.

4. Interview_Schedule_Calendar (Calendar View)
   - Purpose: Used by interview panels and HR coordinators to monitor and manage scheduled technical rounds, HR discussions, and final interviews.

   - Features: Monthly, weekly, and daily calendar views plotted against Scheduled Interview Dates, enabling quick drill-downs into interview queues and daily panel agendas.

5. Candidate_Location_Map (Map View)
   - Purpose: Deployed by the recruitment team to visualize the geographical distribution of applicants based on their current address.

   - Features: Geocode-enabled address pin placement color-coded by Department Applied For; helps evaluate talent availability, demographic reach, and relocation assistance requirements.

6. Application_Activity_Timeline (Timeline View)
   - Purpose: Used by HR operations to monitor candidate submission volume and activity flow across the duration of recruitment campaigns.

   - Features: Displays candidate inflow on a chronological time axis grouped by week, identifying peak application periods to optimize advertising and sourcing campaigns.

7. Department_By_EmploymentType_Pivot (Pivot Table)

- Purpose: Cross-tabulates job roles against contract preferences to assess workforce distribution.

- Features: Two-dimensional matrix displaying Department Applied For across rows and Employment Type Preferred (`Full-Time`, `Part-Time`, `Internship`) across columns, calculating exact applicant counts per cross-section.

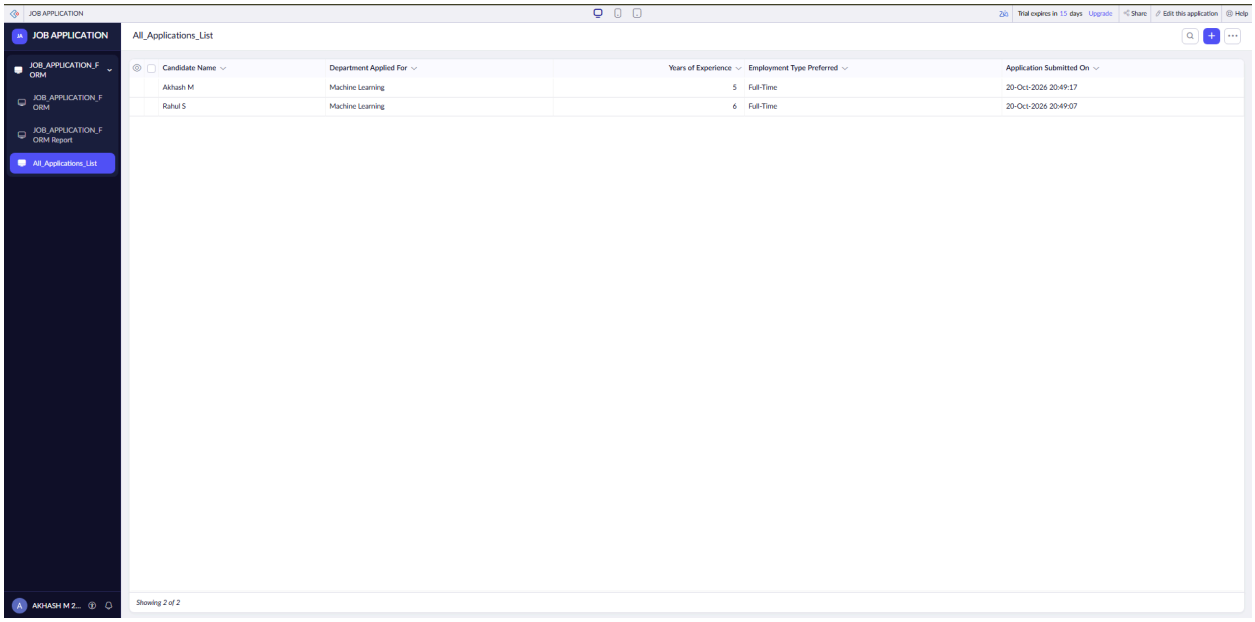

8. Department_Applications_Chart (Chart View)
   - Purpose: Used in hiring review meetings to visually compare application volumes across business departments.

   - Features: Interactive bar chart visualizing Department Applied For on the X-axis against total application counts on the Y-axis, pinpointing high-demand roles and talent shortages.

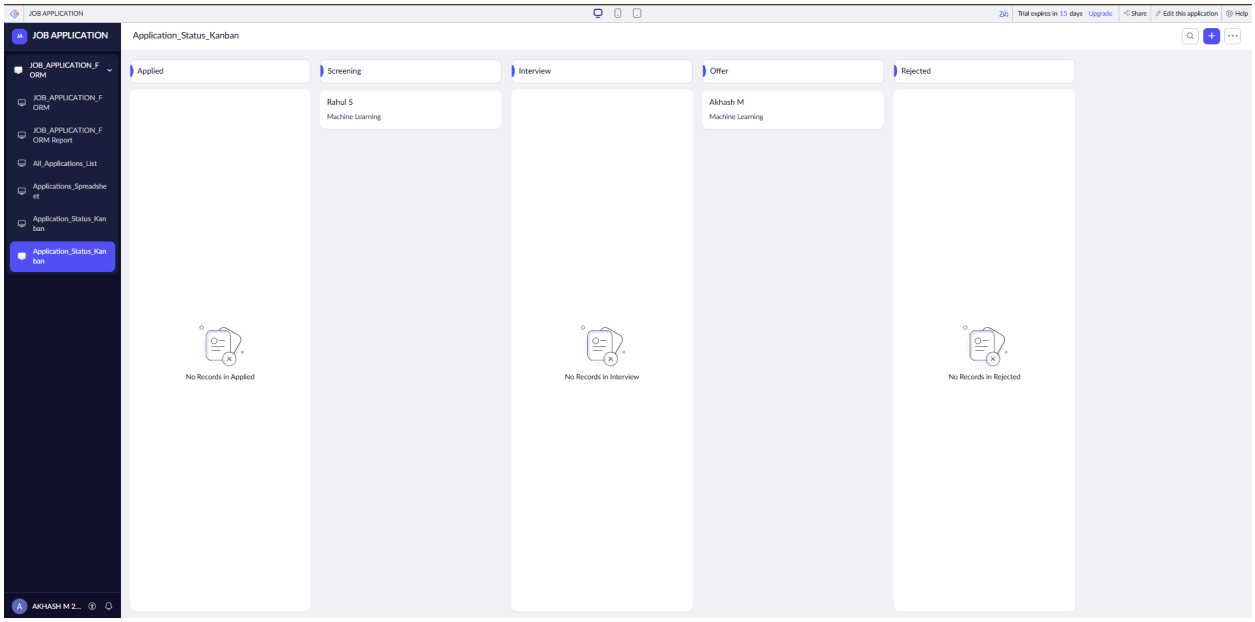

9. Department_Wise_Summary (Summary View)
   - Purpose: Used by leadership and department heads to gauge talent pipeline health and applicant seniority.

   - Features: Groups records by Department Applied For and calculates aggregate pipeline metrics, including total application count and average years of experience.
