JOB APPLICATION - AUTOMATION SUITE AND WORKFLOW OPERATIONS

Aim

To build an automated hiring system in Zoho Creator that handles candidate applications, interview reminders, job offer approvals, stage transitions, and rejection emails automatically.

Theory

Using **Deluge scripts** in Zoho Creator allows us to automate repetitive HR tasks:

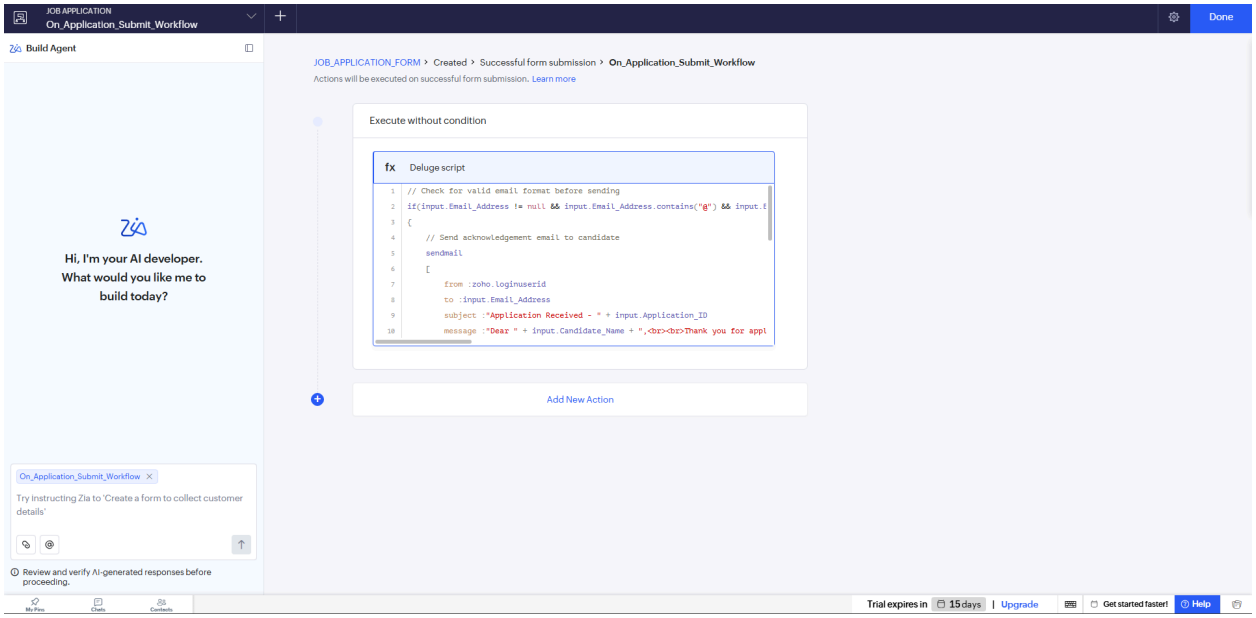

- **Form Workflows:** Trigger automatically when a candidate submits an application to calculate expected CTC and send a confirmation email.
- **Schedules:** Run daily in the background to send interview reminders without manual work.
- **Approvals:** Route job offer requests to managers step-by-step before sending official offer letters.
- **Blueprints:** Guide candidate status step-by-step (Applied → Screening → Interview → Offer → Hired / Rejected) and force HR to enter feedback comments.
- **Batch Workflows:** Process multiple candidates at once (like sending bulk rejection emails at the end of the day).

Procedure

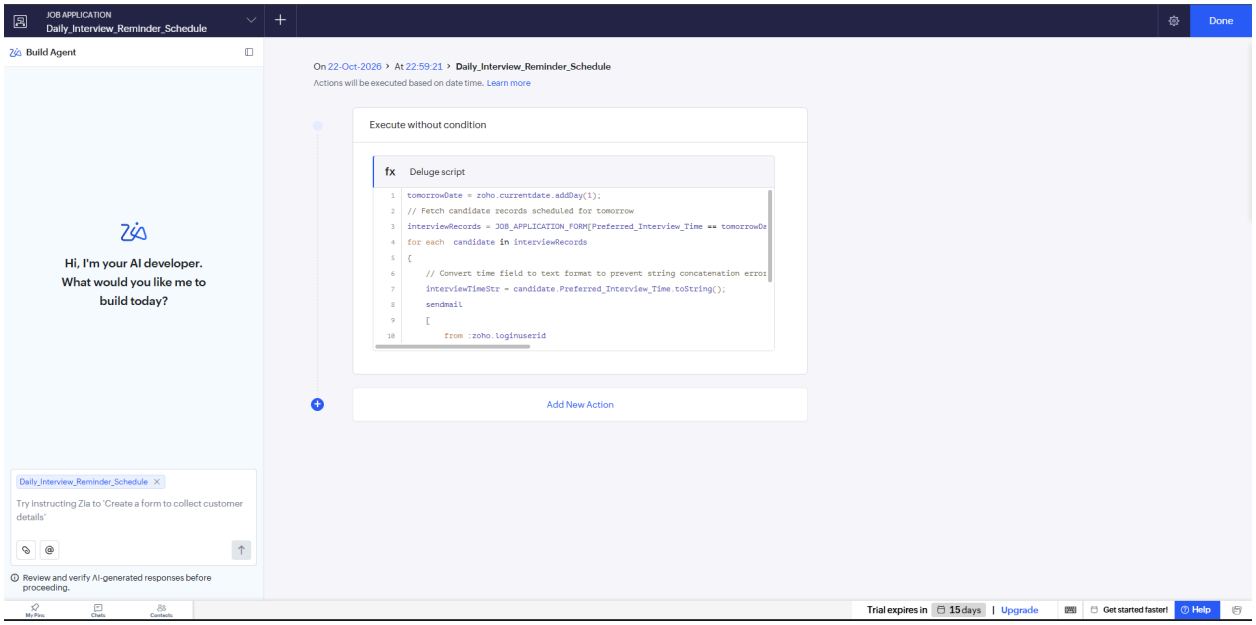

1. **Application Submission:** Set up On_Application_Submit_Workflow on JOB_APPLICATION_FORM to generate candidate IDs, calculate expected salary hike, and send welcome emails.

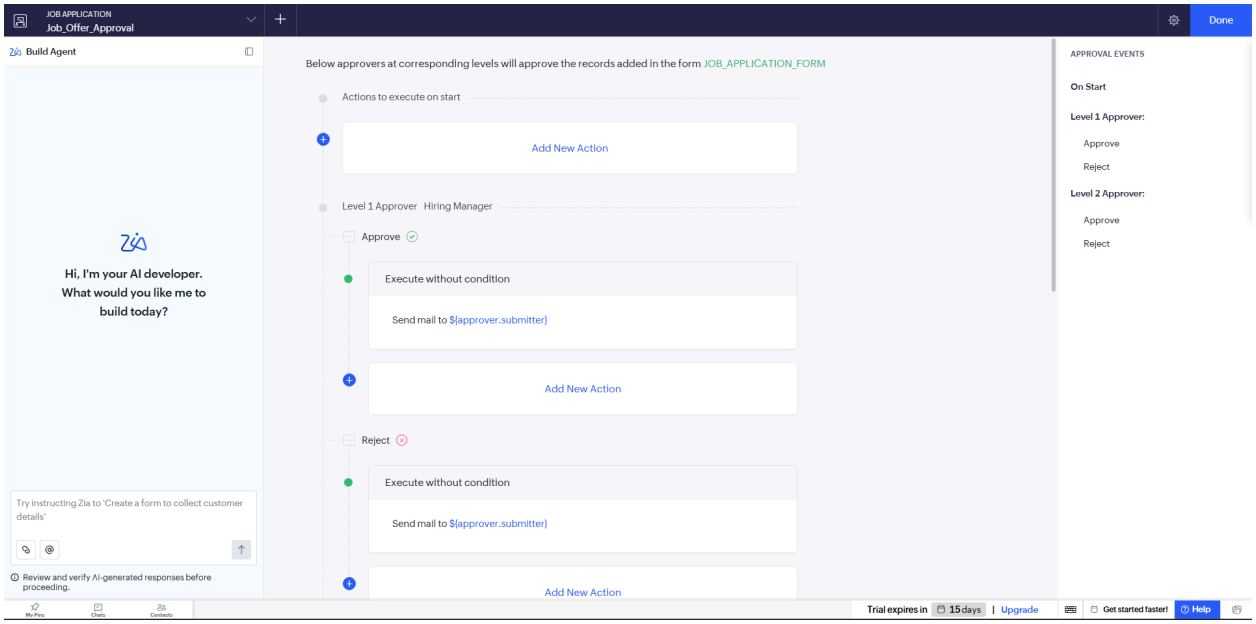

2. **Interview Reminders:** Set up Daily_Interview_Reminder_Schedule to run daily, find candidate interviews scheduled for tomorrow, convert the time to text using .toString(), and send reminder emails.
3. **Offer Approval:** Create Job_Offer_Approval with two levels (Hiring Manager → HR Head). On final approval, set status to "Offer Approved" and run Generate_Offer_Letter_Function.
4. **Candidate Blueprint:** Create Application_Lifecycle_Blueprint with stages (Applied, Screening, Interview, Offer, Hired, Rejected) and enforce mandatory feedback comments for every transition.
5. **Bulk Rejection Batch:** Configure Bulk_Rejection_Notification_Batch to run daily at 9:00 PM for candidates marked "Rejected" in the last 24 hours and automatically send rejection emails.
6. **Offer Letter Function:** Create Generate_Offer_Letter_Function to generate an HTML offer letter PDF and email it directly to the candidate.

Result

The automated recruitment system in Zoho Creator is fully operational. It eliminates manual follow-ups, enforces approval steps, sends daily reminders, and smoothly manages candidate status updates.
